Avery County Sheriff Kevin Frye is getting high tech in his efforts to prevent crime.

"I've started a website that will help assist in stopping on-line predators," he said.

Frye is working with KIDSCOMEFIRST.ORG, and has developed a MySpace page.

"We're encouraging kids to add law enforcement officers' webpages to their friends lists so that we can have access to see who's talking to them, who their friends are, and it gives us a way to help better protect them," he said.

Frye also hopes would-be predators will be deterred when they see law enforcement on kids' friends lists.
