

Beech Mountain to light up the night- finally!

Fireworks didn't go as planned on Beech Mountain.

In fact- they didn't go at all. According to Beech Mountain fire chief Jim Brooks, the fireworks are set off near the top of the mountain- and clouds were a detriment earlier this week. Hopefully when firefighters try again tonight- Beech Mountain will finally be able to have its show.

Brooks says not many places are having fireworks shows tonight- hopefully it will give Beech Mountain an edge.

The meadow across from town hall is the perfect spot, according to Brooks. Several restaurants on the mountains will also be open. According to Brooks, it should be a good time.
