

Heat still on at Grandfather

Written by

Thursday, 09 August 2007 20:00

Yesterday the daily high temperature record was broken at Grandfather Mountain: For the third day in a row.

With a high of 81 degrees, 1979's record of 79 degrees was overthrown. That's two degrees away from the 83-degree all time highest temperature ever recorded on Grandfather-set in 1983 and 2005.
