The Lenoir-Rhyne University Department of Athletics will introduce a brand new state-of-the-art football scoreboard this fall.

The old scoreboard will be moved to the practice field located directly behind the stadium. The scoreboard is a Model 3680 Outdoor LED Football Scoreboard and is being built by Electro-Mech Scoreboard Company.

The entire unit includes a four-speaker audio system, a 19mm 288 x 765 pixel LED video display, decorative truss, ID panels and graphics. The body of the board will consist of matte black, red LEDs, white accent striping and 20mm 16 X 96 electronic team names.

Electro-Mech Scoreboard Company has been manufacturing quality scoreboards for sale since 1963 and is based in Wrightsville, Ga. Electro-Mech has established itself as one of the top manufacturers in the industry by building products with exceptional quality, one scoreboard at a time.

Electro-Mech Scoreboard Company is proud to offer state-of-the-art LED scoreboards to every level of competition.
